

Date 17th November, 2017

Dear parents and carers,

We are excited to let you know that we have a mobile planetarium visiting the school on November the 30th! This links in with Hedgehog's topic and Otter's science and is an incredible opportunity for the children to experience space without having to do an awful lot of training and risk assessments!

The experience enriches the children's curriculum and will provide them with an introduction to space and the night sky. Each class has 45 minutes inside the dome.

There is a cost attached and until we have our Parent Pay system fully live we are asking for payment to be made in cash to the office. If you have any difficulty in paying please come and talk to us. Please pay the office at your earliest convenience.

Yours sincerely,

Lara Jeffries
Headteacher

Name and class of child: _____

Paid £4.50 (tick in box to show payment given to office):
